

**Providing Solutions through reliable service**

## **Integrity Networks**

### **Your Premier Choice for Structured Cable, Security and Wireless Technology**

Integrity Networks is a Premier technology company serving high-tech entities in the commercial and government markets throughout the Pacific Northwest and Pacific Rim.

Our comprehensive line of products and services include the design, installation, project management and maintenance of structured cable systems; related network infrastructure; wireless network systems and physical security. Our technical resources have been certified and widely trained in the latest technologies giving Integrity a level of experience that is unsurpassed in our industry. We have set the standard in responsiveness by providing unparalleled customer service 24 hours a day, 7 days a week, 365 days a year.

Integrity specializes in design/build construction, tenant improvement and service work. We consistently provide all of our customers with premier craftsmanship, quality and service.

Our complete range of cabling systems consist of Categories 5E, 6, 6A copper network infrastructure along with 10GB multi-mode and single mode fiber optic cable systems. Our installations are fully Standards Compliant and accompanied by manufacturer warranties.

Our wireless team provides consulting services, installation and configuration for wireless access points, spectrum analysis and performance audits, while delivering highly secure and reliable network access to the workplace.

Integrity Networks provides the latest in security applications to include Access Control, Intrusion detection and IP Video, enabling you to manage, safeguard, authenticate, and scale your security systems and video surveillance information more effectively.

Single and multi-site infrastructure.  
Including voice, data, video and security.

## Commercial Experience

- Enterprise & High Tech
- Healthcare
- Biotechnology
- Financial Institutions
- Tenant Improvements
- Data Center, Co-Lo & Telco
- Education

## Services

### Structured Cabling

- CAT 5E
- CAT 6, 6A
- Multi Mode & Single Mode Fiber
- COAX (CATV, MATV)

### Security

- Access Control
- Intrusion Detection
- IP Video
- CCTV

### Wireless

- Aruba Wireless
- Distributed Antenna Systems

### Government

- NIPRnet cabling and infrastructure
- SIPRnet cabling and infrastructure
- Protected Distribution Systems (PDS)
- Alarmed Protected Distribution Systems (APDS)
- Wireless SIPR and NIPR networks
- Physical Security (intrusion detection, card access, surveillance)

### Outside Plant

- Boring & Trenching
- Heavy Cable Construction
- Aerial, Buried & Fixed Systems
- Manhole Placement

## Customer Profile – Government

Integrity routinely performs as a subcontractor to both leading defense IT prime contractors and Washington Technology Top 100 firms. We have provided services to the United States Air Force, Army, Navy and Marine Corps and take great pride in our active and ongoing support of our nation's defense systems.

From installations in a single building to base-wide technology upgrades, the Integrity team has consistently exceeded customer expectations for Infrastructure Services. Our team is especially well versed in SIPRnet/NIPRnet military applications and has performed on many projects requiring cleared personnel.

Integrity possesses a turn-key design/build capability and can help end users ensure compliance with all applicable DoD regulations and standards. Our team's unsurpassed technical knowledge is backed with resources to meet the needs of any customer, of any size.

### Government Experience

- Air Force
- Army
- Navy
